

Detailed Directions:

From Fayetteville take Hwy 45 to 412 at Hindsville or Highway 16 to 74 to 412 just past Huntsville. We are east of Fayetteville about 50 miles. That is east of Huntsville, Marble, Dry Fork. Staying on 412, look for Hwy 103 north to Green Forest but don't turn there, keep going on 412.

From Eureka Springs:

Go east on Hwy 62 through Berryville. Just before you get to Green Forest turn right (south) on Hwy 103. Stay on 103 until you hit Hwy412 . continue with "From 412/103 junction (west)"

From the north east or south east (Springfield, MO, Little Rock, AR)

From Springfield it is about a 1.5 hour drive. Take 65 south. In Arkansas From Hwy 65, Harrison take Hwy 412 west toward Eureka Springs to Alpena, stay on 412 (left turn in Alpena). About 12 miles west of Alpena (still on 412) and 1.5 miles west of the Hwy 103 South Junction (to Osage) turn left (south) onto Carroll County Road 937. Carroll County 937 is at the bottom of a hill just where the passing lane starts. There is a driveway that goes to a trailer house about 20 feet east of County Road 937 near the bottom of the hill. If you go up a big hill with a passing lane and see a sign for 937 (near the top of the hill) or if you see the 103 NORTH junction to Green Forest you have gone too far. Once you are on 937 near the bottom of the hill you will see a row of mailboxes, mine is a black one 428 CR 9351. There will be a sign about 50 yards from the highway where 935 forks to the left.

From 412/103 Junction (west):

At about 1 mile east of the 103/412 junction and just as you start going downhill, you will see County Road 937 (937 starts near the top of the hill and meets the highway again at the bottom of the hill further east). From the west you have the option of turning onto 937 and taking it to the bottom of the hill where you have to make a nearly 180 degree turn onto 935... OR keep going on 412 to nearly the bottom of the hill and at about 1.5 miles past the 103 junction, make a sharp right turn going downhill, onto Carroll County Road 937 (sign is difficult to see but we will try to have some balloons, glass or something at the turnoff). The second 937 junction is the 3rd turnoff after the first 937 junction (937 is close to the top of the hill, pass 2 driveways then 937 is near the bottom of the hill). There is a driveway that goes to a trailer house about 20 feet east of County Road 937. Once you are on 937 you will see a row of mailboxes, mine is the second one, black, 428 CR 9351. There will be a sign about 50 yards from the highway where 935 forks to the left. Follow directions below once you are on 935.

On Carroll County Road 935

Once you are on 935 stay to the left 2.8 miles and you will end up at Red Fern Glass. Once on 935 you will go over a cattle guard, a small concrete bridge, and another cattle guard within the first mile. After the first steep hill you pass three driveways to the right in the next mile or so. Keep going past a couple orange gates on the left at 1.7-1.9 miles from the highway and a couple more orange

gates on your left once you turn onto 9351. They are normally closed, if open don't go through them. Many people miss the last left at the top of the hill (2 miles from highway) for 9351 (this sign is easy to miss) If you miss 9351 you will pass a house on the left then two houses under construction/newer looking on the right and another small house on the left and the road will eventually disappear or you will end up following the natural gas line which is more of a path than a road. If you have gone much more than 3 miles and are not at my house or studio go back and look for the sign for 9351. I am about .75 miles down 9351.

When you are close, you will come to the natural gas line first, then the fenced garden where you will see some glass decorations, the driveway curves to the right at the garden gate. There are a couple storage buildings/well house/carport, then the house with rough wood siding, partially two stories. The studio is all the way at the end of the driveway where there is a galvanized metal building and a rough wood building (studio). The entrance is on left side of the wood building. If you get lost call 870-553-2592 (studio) or 870-553-2305. Or go to Osage and ask Newt for help.
